

Aperture Science: Company Overview

Introduction

Aperture Science is a leading research facility specializing in advanced portal technology, artificial intelligence, and experimental physics. Founded in 1947, we have pioneered groundbreaking discoveries in quantum tunneling and sentient AI development.

Core Technologies

- Portal Gun (Aperture Science Handheld Portal Device)**: Creates inter-dimensional portals for instantaneous travel
- GLaDOS (Genetic Lifeform and Disk Operating System)**: Advanced AI system for facility management
- Weighted Storage Cube**: Essential testing element with mass distribution properties
- Aperture Science Sentry Turret**: Automated defense system with friendly personality

Mission Statement

To push the boundaries of science while maintaining rigorous safety protocols and test subject welfare.

Key Facilities

- Enrichment Center (Main Testing Facility)
- GLaDOS Chamber (AI Core Housing)
- Portal Device Manufacturing Wing
- Research & Development Laboratories

Safety Classification

All personnel must complete mandatory safety orientation before accessing any testing chambers.
