

Aperture Science Emergency Evacuation Protocol

Overview

This document outlines emergency procedures for all Enrichment Center personnel and test subjects. Memorize these protocols for your safety.

Emergency Types

Class 1: Fire

- Response**: Immediate evacuation
- Alarm**: Continuous siren (High pitch)
- Assembly Point**: Main reception area

Class 2: Neurotoxin Leak

- Response**: Seal all testing chambers
- Alarm**: Warning beep pattern (3-beep sequence)
- Assembly Point**: Roof level emergency platform
- Duration**: Remains active until GLaDOS declares safe

Class 3: Portal Instability

- Response**: Cease all portal usage
- Alarm**: Distinctive "Portal malfunction" voice announcement
- Assembly Point**: Portal-free zone (Specified by AI)

Class 4: GLaDOS Malfunction

- Response**: Proceed to emergency testing chamber
- Alarm**: GLaDOS voice: "This is a test"
- Assembly Point**: Designated by Morality Core

Evacuation Steps

Step 1: Alert

- Announce emergency type over PA system
- Activate proper evacuation alarm
- Alert GLaDOS of situation (If functional)

Step 2: Assembly

- Move to assigned assembly point
- Wait for role call
- Do not use portals (Unstable during emergencies)

Step 3: Roll Call

- Test subjects counted by AI

Personnel check-in with supervisor
Missing personnel reported immediately

Step 4: Evacuation Transportation

Emergency rail system (Manual override available)
Aerial transport (For roof-level assembly)
Underground tunnel network (Only for authorized personnel)

Required Emergency Equipment

Personnel Kit

1. Emergency portal device (Standard or blue/orange)
2. Light-bearing headgear
3. Emergency whistle (For location signaling)
4. Jump-jets (If available in your sector)

Test Subject Kit

1. Longer-fall boots (Emergency variant)
2. Stress-relief companion cube (Pocket-sized)
3. GLaDOS evacuation pass (Show when safe)

Important Notes

During Class 2 Neurotoxin events, immediately seal all access points
Do not engage GLaDOS during Class 4 malfunctions
Emergency cake is available at assembly point (Subject to availability)
